@MindfulTester

Exploratory testing

**Simultaneously** designing and executing tests to **learn** about the system, using your insights from **the last experiment** to inform the **next**. – Elisabeth Hendrickson

A mind map diagram with a central node 'First test session' connected to four sub-nodes: 'Charter', 'Test idea', 'Explore', and 'Debriefing'. The central node is on the left, and the sub-nodes are on the right, connected by green curved lines. A small blue circle is at the junction of the central and sub-nodes.

Debrief

Tell one thing you did  
in your group.

NB no bug reports.

# Debrief

**ir. Han Toan Lim** @MIndfulTester · 1 nov.

Als antwoord op [@BruceOnlyBruce](#)

In one company I debriefed with a developer after every test session. He gave me new test ideas and he got information about testing.

This might also work for two developers: one who develops and one who tests.

## Charter 2

A persona is person with a need,  
who interacts with the system.

## Charter 2

Need: acceptance, cooperation , safety,  
purpose, learning, support, inclusion, etc.

Als antwoord op [@AGareev](#)

[@AGareev](#) [@alanpage](#) I know that there is a **child in me**. So long I give this voice enough room, I can learn & experiment the rest of my life.
